Memorial Service Marred By Rain

The annual memorial service for the men of Didsbury and district who fell in the Great War was held Sunday afternoon at the cenotaph.

Veterans of this district and from neighboring towns assembled at the Oddfellows' Hall, and led by the Didsbury Boys' Band, paraded to the Butte where a very large number had gathered for the service.

Following devotional exercises conducted by Rev. A. J. Mitchell, the ceremony of laying of flowers was performed. Wreaths were laid by Mrs. J. E. Hugert for the I. O. O. F. and Mr. J. H. Lovrie for the Canadian Legion. Numerous other sprays and bouquets were laid at the memorial. The "Last Post" was sounded by Dr. H. C. Liesemer, and after observance of a two-minute silence Dr. Liesemer conducted the "Reveille".

Rain, which recommenced at this time, caused the padre to disperse with his address, so that the service was concluded by the singing of the National Anthem and a benediction.

Lady Injured When Car Overtakes In Loose Gravel

Overtaking their car in loose gravel 4 miles south of town last evening, the driver Miss C. Clark of Edmonton escaped injury, while her companion Miss Zeta Christie of Jasper Park, owner of the car, was taken to the Didsbury General Hospital suffering from a number of gashes and bruises. Miss Christie's injuries are not critical.

Miss Christie, daughter of Dr. Christie, formerly of Red Deer, had driven the car from Banff and had just turned the wheel over to Miss Clark a few minutes before the accident occurred. The car, light in weight, struck the loose gravel, was thrown into the ditch and turned completely over. The top of the car and one side received severe damage. The windshield was broken and one fender and headlamp dented.

During the absence of Mr. W. A. Austin, town secretary, the office will be in charge of Miss Nelda Hugert.

Didsbury Citizen Has Car Stolen at Vancouver

That it takes more than locks to protect a car from thieves was the discovery made by W. G. Liesemer at Vancouver recently.

Mr. Liesemer who is holidaying at the coast left his car all day locked in front of his apartment in Vancouver. A few minutes later the car disappeared.

Notifying the police Mr. Liesemer issued a search to be started, and after two days the car was found in some brush about five miles from where it was stolen. Locks and glass had been broken.

Telephone Staff Promoted

Miss M. Sangstead, chief operator at the local office of the Alberta Government Telephones left on Monday for Portland, Ore. where she expects to be married in the near future.

Miss Sangstead's resignation meant the promotion of Miss Lucille Smith to the position of chief operator. Miss Campbell of Calgary has been transferred here and Miss Dorothy Ranton has been appointed to the permanent staff.

Bridge Players Dream Comes True

Grand slams bid and made at contract bridge are few and far between, but two of them on successive hands at the same table and both giving identical scores is something almost unheard of.

Almost 1000 points behind the game, C. E. Reiber and J. W. Walton thought they had earned the match when they reached a contract of seven spades. Mr. Reiber played the hand and fulfilled the bid. He scored 1500 points for the slam, not vulnerable, 100 for honors and 210 for seven spades.

The cheating was not ended before E. V. Woodcock and J. E. Hugert accomplished the same feat. With Mr. Woodcock the declarer the pair on the next hand reached a contract of seven spades. Mr. Woodcock also had 100 for honors and scored the same points as Mr. Reiber did on the previous hand.

Rain Here Too Late for Early Crops

Will Benefit Late Crops and Gardens.

Heavy showers in the district on Sunday afternoon and night were believed to be too late to help early crops, but will do a great deal of good to late crops and gardens.

The rain will delay cutting, which will be general this weekend, at least for a day.

Former "Pioneer" Editor To Wed.

Mr. and Mrs. J. L. Foxsmith, of Stately announce the engagement of their youngest daughter, Miss Eva May, to Mr. Benjamin Gooder, eldest son of Mr. and Mrs. W. C. Gooder of Olds. The marriage will take place the latter part of August.

Dairymen's Association Will Meet on Saturday

The Didsbury Dairymen's Association will meet in W. W. Gillrie's office this Saturday evening at 8 o'clock. General business.

Presents Sacred Concert

The Concordia Lyric Quartet of Concordia Seminary of Lutheran denomination at St. Louis Mo. presents a concert of sacred music at St. John's Lutheran Church, Didsbury, on Friday, August 17th at 8 p.m. This year they are featuring "The Christian Life in Song" in sixteen beautiful chorals and hymns in four-part harmony. The public is kindly invited.

Agricultural School to Reopen

Announcement is made by Hon. F. S. Grisdale, minister of agriculture, that the school of agriculture at Vermilion will be re-opened this fall, provided the registration of students is sufficient to warrant it. The school at Olds will continue to operate.

Dominion Loans Calgary \$200,000; Edmonton \$500,000

Details of the Dominion government's relief agreement with Alberta described by Hon. Geo. Hoadley as "fair and generous as is possible, considering the magnitude of the national problem," were released at Ottawa yesterday morning. The principal figures comprise:

Loan to city of Edmonton	\$500,000
Loan to city of Calgary	200,000
Loan to Lethbridge	50,000
To complete Jasper highway	125,000
To aid direct relief—monthly grant	100,000
To complete the Trans-Canada highway in the province	150,000

The City of Edmonton sought a loan of \$1,500,000 from the Dominion through the provincial government. Of this, \$1,000,000 were designed for public works, and the \$500,000 for current purposes. The government authorizes a loan of \$500,000 without defining the purpose to which it is to be used. The city can use it as it pleases.

The grant of a loan of \$200,000 to Calgary contrasts with request for \$500,000.

In the case of Lethbridge, where \$150,000 was sought, \$500,000 is allowed.

The province proposes to spend \$300,000 to complete the Trans-Canada highway between Banff and the Saskatchewan boundary.

The Dominion agrees to assume half of the cost and to loan \$150,000.

Similarly, as stated, \$125,000 is furnished for completion of the highway to Jasper from Edmonton.

The Dominion also contributes \$25,000 to assist in the labor cost of the new building at the Ponoka mental institution.

Up to June 30 the province had borrowed from the banks and spent \$645,000 in agricultural relief. This loan is taken over by the Dominion on more favorable rates.

The Alberta government also requested a loan to finance its part of direct relief, but the government here preferred that the province make monthly statements of its cost, which will be dealt with from time to time.—Calgary Herald.

WEEKLY SERMONETTE

"Wherever there's a human being—there's an opportunity for kindness."

Family Reunion Ends in Death

One Killed, Two Injured At Bowden

A tragic end to a happy family reunion resulted from the fire and explosion in the Central Creamery, at Bowden, when one man had travelled hundreds of miles to attend the reunion, was killed, while his brother and brother-in-law received serious injuries.

The fatal fire occurred in the town late Monday afternoon, and the victim was Fred Trimble, of Brownsville, Texas, who died of burns in the Innisfail hospital at about 11 o'clock Monday night.

The injured are: A. A. Prout, manager of the creamery, who was badly burned about the face and arms; and Alfred Trimble, of Redway Centre, Alberta, a brother of the dead man, who received minor injuries.

The victim of the fire was 54 years of age and was a son of A. H. Trimble of Bowden, and a brother of B. C. Trimble of Olds. He is survived by his widow and four children, ranging from 14 to 23 years of age, all of whom are now in this vicinity visiting relatives.

The fire was believed to have been caused by an explosion in boiler room of the creamery, and the three men who were in the building at the time were caught in the blaze which followed the blast. The creamery was destroyed.

When taken from the blazing building the three were immediately rushed to the Innisfail hospital, but Mr. Trimble's injuries were so severe that he died a few hours later.

It was reported Tuesday morning that Mr. Prout is still in hospital, but is progressing favorably toward recovery.

The injured men were all relatives. Mr. Trimble and his brother being brothers-in-law to Mr. Prout. The dead man had come to Alberta on a visit to attend the Trimble family reunion which was held at Olds on Sunday, and was on a short visit with Mr. Prout when the tragedy occurred.

The town people assisted in every way possible to stop the blaze but on account of shortage of water could not save the building. The loss is fully covered by insurance.—Calgary Herald

Economic News In Fashion

Periodically, organizations throughout the country pass resolutions deprecating the treatment of certain news by the public press, but, as a rule, these are ill-considered. However, the motive behind them for the simple reason that the press itself is the finest barometer of public opinion. Newspaper could not survive did they not interpret aright the desires of the public to which they cater; they could not exist as profit-making institutions, were it not for the fact they keep a wary finger on the flickering pulse of the public reading public they serve. The success of a daily newspaper depends upon its ability to give the public what it wants. That is why circulation has become the criterion of success in the newspaper field.

The "wants" of the reading public vary from time to time, and policies of the newspapers must vary with them. Hence, news fashions change, as fashions in clothing change; and it is extremely diverting to study the changes as they appear in the columns of the daily press.

A week or two ago, H. R. Knickerbocker, well-known European correspondent of the Hearst organization, arrived in England to write a series of articles for Hearst newspapers on the economic recovery of Great Britain. In the course of an interview, he said:

"One of the most remarkable things that has happened to the American Press since the depression started has been the public demand for economic news. Before 1929, nobody cared much, but when the slump hit America, it produced some peculiar results.

"Economic news now is considered as important as the latest sensational murder story. Whether the readers understand it or not, I don't know, but Americans have acquired a sudden curiosity to know what is happening to the rest of the world. Consequently, newspapers make a regular feature of analyses of world economic news."

Students of newspaper trends had been struck with this popularization of economic news in the United States, particularly through the writings of Walter Lippman, perhaps the most famous of all the commentators of economic events. In Canada, during the same period, a similar tendency has been remarked, the manifestations of which, perhaps, have been more abundant for reasons which are not far to seek.

Recent provincial elections in British Columbia and Saskatchewan especially, have demonstrated clearly that the public is more aware to absorb information on economic matters, more desirous of listening to economic discussion from the public platform, than ever before.

This is primarily due to the fact realization of their dependence upon world markets has been brought home to the people of the prairie west more directly than heretofore. They have become acutely aware of the fact that anything affecting the economic condition of the English-speaking world, the French vineyard laborer, the coal-miner of Scotland or Wales, sooner or later, is reflected in their own economic condition. They know now that anything which affects the purchasing power of German, Austrian, Jap or Chinese wage-earner, must eventually have its reflex here.

World economic news, therefore, has assumed new and more impressive proportions in the eyes of the Canadian people. The vital importance of a healthy world economy has become all too obvious. Consequently, when news turns bullish, when word comes that Britain is shuffling off the coils of long internal depression, the items partake of something more than the evanescent interest of the murder mystery or the world sex drama.

New political movements, too, have had their genesis in economic discontent, hence it is only natural that economic discussion should attract an ever widening public. The one drawback to the new fashion lies in the fact that economics, so far, has not been reduced to an exact science, whose truisms can be set forth with the precision of mathematical formulae. For that reason, it is essential that commitment to any specific theory should follow, not precede, complete study of economics, not as it has been advanced by some proponent of a particular doctrine, but as it has been advanced throughout economic history. The truth cannot be determined by study of one set of theories, but by analysis of all theories so far advanced from times preceding Adam Smith to those of latter-day Socialists. Such analysis should be made with due regard to practicability, as demonstrated in political history; not in the field of statecraft alone, but in the wider field of trade and commerce, particularly during the last century and a half.

Mosquitoes Hate Yellow

Avoid This Color But Adore Navy Blue And Red

If you would be free from annoying mosquitoes, wear yellow. They simply hate it. If, however, you would like to receive the attentions of the little blighters, just wear navy blue, which they adore. They are keen on dark red, but adore navy blue. Yellow, white and orange are passe and yellow makes them bilious. These findings, states the Canadian National Steamships, have developed from recent studies and the company recommends yellow suits and yellow tops for tropical duty where mosquitoes are liable to abound.

Prosperity Village

Small Place In Holland Keeps Rich During Local Taxes

Six times now within the past twelve months have the local taxes been reduced in the village of Eledorp, near Leiden, in Holland's bulb growing district. It is known as prosperity village. School fees, marriage fees, water and electricity charges have all come down. Only 75 of the 2,700 inhabitants are "on the dole" and they can't earn their allowance and keep themselves occupied by draining ditches. But no outsider can enter the village free. A turkpie man collects a small charge from every stranger who would come inside.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the profuse diarrhoea, the vomiting and purging to continue for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels take one to your drug and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this up natural action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's." It has been on the market for 88 years.

Colonization Finance Corporation

W. C. McKillop, Former Dean Of Manitoba Agricultural College, Appointed Farm Manager At Indian Head

T. O. F. Herzer, General Manager, of the Colonization Finance Corporation of Canada, Limited, has announced the appointment of W. C. McKillop, former Dean of the Manitoba Agricultural College, as farm manager for the Indian Head zone of the Colonization Finance Corporation succeeding O. S. Longman who has accepted the appointment of Field Crops Commissioner for the province of Alberta. Mr. McKillop is taking up his duties immediately, and brings to his new position of farm manager, a wealth of agricultural training and practical knowledge, and experience of many years as superintendent of the Dominion Experimental farm at Brandon, as well as dean of the Agricultural College.

Mr. McKillop was born on August 22nd, 1882, in Glenora County, Ontario, of Scotch parentage, and was raised on the farm of his father who was well known in Eastern Ontario as a pioneer breeder of Leicester sheep and Holstein cattle, and leader in agricultural affairs. Mr. McKillop gained his education in country school and collegiate institute and attended the Ontario Agricultural College, Guelph, Ontario, graduating with the degree B.S.A. (University of Toronto). In June, 1915, he joined the Dominion Department of Agriculture, as representative of the Seed Branch in Alberta, and was instrumental in introducing seed fairs and seed field competitions in Alberta. He started a seed testing laboratory in Calgary and was instrumental in inaugurating the work of the Canadian Seed Growers' Association in Saskatchewan. In March, 1911, he transferred from the Seed Branch to the Experimental Farms and became superintendent of the Brandon Experimental Farm, his work in this position being very prominent. In 1924 he was the first dean of the Faculty of Agriculture and Home Economics following the inclusion of the Agricultural College in the University.

With the appointment of Mr. McKillop, the Colonization Finance Corporation again has a complete corps of farm managers covering Manitoba and Eastern Saskatchewan, who have under their supervision approximately 1,700 farms totalling approximately 600,000 acres, three quarters of which are occupied by the owners, subject to mortgage or agreement of sale, only 25 per cent operated by tenants. At the end of the present month Louis L. Lang, of Dalmeny, Ontario, president of the Colonization Finance Corporation, first vice-president of the Mutual Life Assurance Company of Canada, and president of the Lang Farming Company of Kitchener, Ontario, is expected to make his second official inspection trip to the west accompanied by a number of directors of the Colonization Finance Corporation who are exponents of eastern financial institutions. It is expected that as a result of Mr. Lang's trip some important announcements will be made regarding the expansion and further operation of the Colonization Finance Corporation.

Wager With Death

Two Colorado Convicts In Test To Determine Value Of New Serum

Two Colorado convicts were made test subjects in a series of tests to determine the value of a new serum its discoverers hope will prevent tuberculosis.

The convicts, Carl Erickson and Mike Schmidt, said they have gained weight and are in good health although they have taken several doses of the serum and live tuberculosis bacilli have been injected into their blood.

The live term convicts were told the serum and injections of live bacilli might kill them, but they volunteered to become subjects of experiments after Governor Ed. C. Johnson promised them pardon if they survived.

Built Fireproof Nest

A pigeon nesting in the courtyard of the federal building at Denver, Colorado, was apparently influenced by ideas of fireproof construction used in the structure. Despite an abundance of twigs and shrubbery it made its nest entirely of wire paper clips. J. M. Lee, janitor, who discovered the nest, reported that there were two eggs in it.

New Air Service

Direct air passenger express service between Seattle and British Columbia became effective July 1 when United Lines resumed operation into Vancouver. Extension of the Pacific coast airway will place the Canadian and Mexican borders only 12½ hours apart.

Agricultural Notes

Many Items Of Interest To The Western Farmer

Suban grass is being grown more extensively this year for pasture purposes in the St. Lawrence counties of Eastern Ontario.

Commercial canning is one of the oldest of the larger organized industries in the Dominion. The first factory was established at Grimsby, Ontario, in 1878.

Seed cleaning operators in British Columbia state that, owing to the general low vitality of the timothy seed cleaned this year, much more seed was blown out in cleaning than in previous years, in order to improve the germination.

A saving of thousands of dollars in preparing grasshopper mixtures in Alberta has been effected by the pulverization of the sweetest used, on the recommendations of the Dominion Seed Branch inspectors, thereby resulting in the use of only 20 per cent, of bran instead of 50 per cent, as formerly.

Under the amended regulations of the Dairy Industries Act, a dairy produce grader may refuse to grade any cheese or butter which in his judgment is of either too high a temperature or too low a temperature to permit proper examination, until the temperature of said cheese or butter is brought within a satisfactory range.

The sale of commercial fertilizers in Saskatchewan has been considerably higher than last year, some 1,400 tons of ammonium sulphate and 1,000 tons of triple superphosphate having been sold. Most of the fertilizer went into the territory east and north of Regina and north of the Saskatchewan-Macklin line. Fertilizer sales in Quebec are estimated at 25 per cent, greater than last year.

Going to dryness, seed prospects in Quebec as at May 21c were not promising, especially for timothy and clover. Farmers, however, had planned to increase their seed production considerably, and a circular was sent to prospective growers acquainting them with the services available to them from the inspectors of the Seed Branch of the Dominion Department of Agriculture.

By the discovery of the late Sir Ronald Ross of the relationship between the mosquito and the spread of malaria, eventuating in a similar discovery regarding yellow fever, not only saved millions of human lives but enabled millions of acres of potentially fertile land in tropical and subtropical areas of the world to be planted in economic crops. Previously these lands were death-traps to all who attempted to cultivate them or live upon them.

During the ten months ended May, 1934, the amount of wheat exported from Canada was 138,528,849 bushels.

Two Canadian economic crops went to Empire countries—Irish Free State, New Zealand, Malta, other dependencies, and the United Kingdom, the last named alone taking 92,620,081 bushels. The total amount of wheat exported to foreign countries was 45,062,255 bushels. In the order of the amount imported, these countries were Holland, Belgium, France, Germany, Italy, Japan, Norway, Denmark, Sweden, China, Peru, Bolivia, Brazil, the United States, and other small shipments abroad.

Imports of Canadian barley into the Netherlands reached their peak in 1929 when they totalled 142,772 metric tons, or over 41 per cent of the total. In 1930 the imports fell to 11,881 tons, but in 1931 went up again to 108,630 tons. In 1932 the quantity imported was 27,068, and in 1933 there were no imports of consequence. Since the beginning of 1934 there have been no imports of barley from Canada. Despite its absence from the market for a year and a half, Canadian barley is well liked in Holland and some consumers still ask for it although the price is too high to make business possible, says the Canadian Trade Commissioner in Holland.

Stitched Heart Wounds

The medical profession, keenly interested, kept touch by telephone as George Hampton, 41, continued to improve after an operation in a Lancaster, Pa., hospital, in which his heart was lifted from its place, attached to close a stab wound and replaced.

New X-Ray Device

Possible For Doctors Miles Away To Examine Patient

A new X-ray observation device, revealing the anatomy of the least substantial body organs and even the blood vessels in their natural color, has been perfected and patented by Luther G. Simjian, former director of the photographic department of the Yale Medical School, it has been announced.

Mr. Simjian's apparatus not only will show the structure and density of barely opaque parts that appear on present X-ray plates as dim shadowy forms, but lessens existing hazards to the subject being examined. Moreover, by a system of telegraphic wiring between hospitals, it will be possible for a patient to sit before an X-ray tube in one clinic while the image of his internal organs is reproduced for specialists in another clinic hundreds of miles away, or in any number of clinics at the same time.

Superficially, Mr. Simjian's invention resembles the familiar X-ray fluorescent screen which reflects the sharp shadow thrown by the subject as he sits between the source of the rays and the screen. In this shadow, dense objects, such as bones, appear almost black, while tissues of less weight fade into lighter tints of gray. Invariably the diagnostic must indulge in guesswork as he strains to distinguish faint lines of shading.

When the physician desires to peer further into the secrets of a particular organ, such as the heart, he must increase the intensity of the X-rays.

Must Wear Moustache

Budapest is going to have romantic moustache policemen. An order has been issued by the chief of police that all mounted policemen must from now on wear moustaches. It is considered not only conducive to military appearance and bearing, but in line with the national tradition of the dashing Magyar horseman.

"Continental Sabbath" refers to the European custom of closing business places on Sunday morning during church hours and then opening them in the afternoon.

DENICOTETA Cigarette holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Work Is Pressing Forward On Trans-Canada Highway To Link Up Halifax With Vancouver

The rocky tangled terrain along the northern shore of Lake Superior now presents the only obstacle to the completion of the Trans-Canada highway from coast to coast.

Motorists may now drive from Halifax, on the Atlantic coast, to a point 45 miles north of Sault Ste. Marie, in northern Ontario, over reasonably good pavement and gravel roads. From there to Nipigon, however, roughly a distance of 300 miles, lies a rugged stretch over which no car can pass. Here are masses of solid rock of all shapes and formations. There are trees and tangled undergrowth, ravines, gullies and numerous rivers.

Two legs on this uncompleted northern Ontario section have been surveyed and the work planned, but when they will be completed is problematical. One leg runs from the Sea to White River, noted as Canada's champion cold spot in winter-time. The other swings from White River to Hearst. Very little work has been done on either of these stretches yet.

There is a road from Nipigon to Port Arthur, while from Port Arthur to the Manitoba boundary, only about 20 miles of the highway still remains uncompleted. Work on this section is being pushed ahead and it is expected that it will be opened by this coming fall.

From the Ontario-Manitoba boundary the chain of motor roads stretches all the way to Vancouver, on the Pacific coast.

Twenty-five thousand bronzed young Canadians are at present engaged in pushing forward the Trans-Canada highway building program. The majority are battling with northern Ontario's wilderness. Throughout the rest of the country, however, much improvement and repair work is being done.

When these workers reach their goal the quarter-century dream of Canadian motorists will have come true. They will then be able to start in their cars at Halifax and drive to Vancouver, without having to detour through the United States.

Still Below Average

Canadian Wheat Crop Higher This Year Than Last

The International Institute of Agriculture indicated the Canadian wheat crop would be somewhat higher this year than last, but 18 per cent. below the average for the past five years.

This year's figure for Canada's wheat crop was given as 339,000,000 bushels.

Last year's total was 268,000,000 bushels.

The average for the years from 1928 to 1932 was 441,000,000 bushels.

France Sets Wheat Price

Officially Dropped From \$2.60 To \$1.95 Per Bushel

The price of wheat has been officially dropped below \$2 a bushel for the first time in more than a year in France.

A new fixed price of 108 francs per quintal (\$1.95 a bushel) was published in the official journal as the result of a recent law increasing farm aid.

There was a widespread complaint the old price of 115 francs a quintal was not being observed.

No Time Like Present

All men are glad to have pleasant memories, but not all are providing the material for such memories. If you would look back by and by to something that you will be glad you said or did, now is the time to do or say something which will give you food for gladness. Henry Clay Turnbull.

Wet shavings on the floor of a refrigerator car was the simple and inexpensive method adopted by U.S. specialists to keep pens and apples from freezing in transit from the northwest to eastern markets in moderately cold weather.

Summer Care Of Eggs

Must Be Kept Cool And Marketed Often As Possible

Eggs must have special attention in summer time, and extra precautions must be taken to keep them cool. A wire or wooden basket that permits a free circulation of air is ideal for gathering eggs, and they should remain in the basket until they are cool before placing in the egg case. A clean cloth is the best place to keep them before they are marketed, which should be done as often as possible. Marketing twice a week during the summer is not too often.

Tests show that high temperatures are very harmful to the fresh egg, in addition to hastening evaporation, if the egg is fertile. Incubation starts at around 70 degrees and if allowed to progress long enough, the egg becomes unfit for food. The eggs should be gathered two to three times a day, or as often as possible. Removing all broody hens to the broody coop as soon as they are noticed keeps the hens from setting on the fresh eggs, and is the best way to get them back to laying.

Seek New Arctic Seaway

Expedition Hopes To Shed Light On Franklin Tragedy

"I have a strong belief that I may be able to come across relics of the Franklin expedition and throw additional light on this tragic chapter in the history of Arctic exploration," Michael Pearce makes that statement in announcing his plans for an expedition to the archipelago lying between Baffin Land and the Beaufort sea.

Much of this territory, north of Canada, has never been thoroughly explored, and the main coast and adjacent islands are only roughly charted.

Mr. Pearce spent ten years in the Canadian north when serving with the Hudson's Bay Co.

The expedition will endeavor to find a seaway through Fox basin, Fury and Hecla straits and westward, following the mainland to the Pacific.

A Quaker once hearing a person tell how much he felt for another who was in distress and needed assistance, dryly asked him, "Friend, has thee felt in thy pocket for him?"

Outstanding Triumph Of Veterinary Surgery

Operation Saves Valuable Dog After Having Neck Broken

A greyhound, named Somebody's Choice, who, less than a month ago, broke his neck in three places, is again chattering round the training paddocks at Wembley stadium in England.

He looks, and is, the picture of health. His recovery is one of the outstanding triumphs of veterinary surgery.

Somebody's Choice suffered a spectacular fall in a recent hurdle trial. At first he was thought to be dead.

Then it was discovered that he was alive, although his neck was broken.

His owner, S. Curson, begged the veterinary surgeon in attendance to do his utmost.

A brilliant operation was performed. What amounts to an artificial neck has been created by means of delicate silver plates. Flexibility has been achieved by clever manipulation of the vertebrae.

Somebody's Choice will never race again. But he can bark and lord it over all the Mick the Millers in the world: he is the only dog alive to-day with a synthetic neck.

Testing Lumber For Pulpwood

Shipment From Tasmania Being Sent To Vancouver

A mill test of Tasmanian wood which may have far-reaching effect upon the pulp and paper industry of Canada is to be made shortly at the Ocean Falls plant of Pacific Mills Limited, Vancouver.

Suitability of the Antipodean lumber for producing pulpwood for newsprint is the question, and considerable interest is being shown in the four-day test by lumber and newsprint men.

For many years Australia has endeavored to develop a pulpwood industry of its own. There are pulpwoods there that make suitable kraft paper but thus far the manufacturing of newsprint has not been attained.

Extensive laboratory tests have been made, and recently a Tasmanian wood gave promises of results. A large shipment has been sent to Vancouver, on board S.S. Waikawa, destined for Ocean Falls mills where a practical test will be run.

Master: Mary, has anybody telephoned while I've been out?"

Ma: "Yes, sir, but I could not make out the name. To be on the safe side, I said you would let him have something on account tomorrow."

New Observatory At Toronto Will House Giant Telescope, Largest In The British Empire

Natural Weed Choker

Weeds Cannot Thrive Where Crested Wheat Grass Is Sown

As fully explained in the House of Commons recently by the Hon. Robert Weir, Dominion minister of agriculture, crested wheat grass is well adapted for pasturing by virtue of its remarkable ability to withstand close grazing and severe tramping. It is a particularly suitable crop for feed production on the dry land areas of Western Canada on account of its adaptation to dry conditions, its winter hardiness, and its ability to compete successfully with plants of other species. Seeding is believing, and an abandoned field in the vicinity of the Dominion Hange Experiment Station at Margheries, Alberta, was seeded to this grass and was closely grazed from early spring until late fall for five continuous years without apparent injury to the grass cover.

The soil was heavily infested with weed seeds, chiefly Russian thistle and mustard, yet the grass took possession to the almost complete exclusion of the weeds. Owing to its extensive root system which takes up all the moisture, weeds cannot grow in competition with it. All the latest information about crested wheat grass is contained in a pamphlet just issued by the Dominion Department of Agriculture.

About Punctuation

An Art, Like Spelling, That Few Ever Master Completely

Lord Dunsany has been discussing on punctuation. Very few people can punctuate properly. Many have an idea that period is best indicated by a dash, and several poets who send contributions in this direction have dashes scattered all over their manuscripts instead of commas, semi-colons, periods or other points. Punctuation, like spelling, is a gift, and few ever master the art completely, while novices hardly ever gain control of colons, notes of exclamation, and quotation marks.—Hamilton Herald.

Notwithstanding two disastrous hurricanes, bananas remained in 1933 Jamaica's principal item of export. Her two principal markets are Canada and Britain. At one time the chief importer used to be the United States.

PROMINENT CANADIAN WOMEN HONORED BY THE KING

His Majesty the King has named several Canadians to the Venerable Order of the Hospital of St. John of Jerusalem, and among those whom he has been pleased to confer these signal honors are the five Canadians shown above. Top, left to right: Mrs. Amy Angela Bruce, wife of the Lieutenant-Governor of Ontario; Mrs. Olivia Mary MacLaren, wife of Hon. Murray MacLaren; and Mrs. Yvonne Desaulniers Munkin, wife of Hon. R. J. Munro. Below, left and right: Senator Cairine Roy Wilson, Canada's only woman Senator; and Mrs. Mildred Marianne, wife of the Canadian Minister to Washington. All these recipients have been made Dames of Grace of the Order of St. John of Jerusalem.

In the near future, Canada will have the largest telescope in the British Empire, and one of the most modern observatories in the world. The observatory will be located at Richmond Hill, north of Toronto, in a 177-acre park.

This plant with its up-to-date machinery and giant telescope, is expected to reveal to Canadian astronomers many new secrets of the stars. Constructed and equipped under the supervision of Prof. C. A. Chant, head of the astronomy department of the University of Toronto, the observatory will shortly be ready for use. It will then be turned over to the university by Mrs. D. A. Dunlap, the donor, as a memorial to her late husband, a prominent mining man.

The dome and building are now practically completed, and part of the telescope is being set in position. A large English telescope works has been finishing the main reflector for some months. This, too, will be in place shortly.

Inside a huge steel dome will be located the telescope with a 74-inch reflector, the entire assembly weighing around 50 tons. The steel dome is 61 feet in diameter, with a parallel opening 15 feet wide. The moving shutters, running on rails at the top and bottom of the dome, close the opening, and are operated simultaneously by means of wire ropes connected to a motor gear. An emergency hand gear is also provided. Two motor-operated wind screens of sail cloth are mounted in the opening, one rising from the bottom, the other descending from the top.

The dome, which weighs about 50 tons, is carried on 24 central rollers of 25-inch diameter, mounted in ball bearings and running on a rail. Sixteen pairs of lateral roller bearings on the inner and outer edge of the rail keep the dome in position. Two segmental platforms, the lower one at the base of the opening and the upper one at the back 15 feet higher, are fixed inside the dome. Rails are mounted on the parallel straight edges on which runs a bridge five feet six inches wide and divided into two portions, the right hand side forming a stairway, the left being a track on which a truck carrying the Newtonian observing platform runs.

The centre section of the telescope tube itself is a steel casting seven feet in diameter and weighing 9½ tons. Just above the lower half of the casting swells out to eight feet seven inches to accommodate an iris diaphragm for use in stellar photography.

Construction of the diaphragm is similar on a big scale to that of the familiar small camera. But the shutter of many cameras is less than one-half-inch aperture. The shutter of the Dunlap observatory camera opens to six feet, two inches. It is operated by a hand wheel.

Prof. Chant is enthusiastic on the possibilities of discovery and development in the science of the heavenly bodies to be afforded by the new observatory.

Herb Garden Is Useful

Idea Seems To Be Gaining Popularity In Canada

The herb garden is rapidly becoming a Canadian institution. All sorts of English favorites are found to grow well in Canadian soil. The best place to plant the herb garden is right outside the kitchen door where it will be handy for the picking. Herbs that add spice to the cooking and that are easily grown in the average back yard are: Tarragon, mint, chives, marjoram, sage, parsley, leeks and various other members of the onion family.

Streamlining Saves Coal

Streamlining has come to naval architecture. Appearance of the Arctic, second of two British tramp steamers to be built on the Streamline plan in the home harbor, caused widespread interest along the waterfront and elicited the information from her captain, Keith Williams, that his ship burned five tons less of coal per day than other steamers of a similar class.

Modern Idols.

Idol worship is associated by moderns with the pagan religion and the superstition of the barbarians. The thought of worshipping a "heathen idol" is so far removed from the mind of modern civilization that man of today cannot understand the state of mind which prompted his pagan or barbarian ancestors to prostrate himself and offer sacrifices to the images he erected to his gods.

There is no doubt that at one stage man worshipped idols, but there is some doubt that at this stage man has wholly ceased his idol worship.

While Moses was on the Mount the children of Israel disobeyed his law and set up a golden calf to worship. The children of Modernity have set up their idols that they might worship them.

The oriental worships a bejeweled Buddha on the same day the Canadian maidens worship hand-some movie stars; fans worship baseball, football and race idols, and children worship their soldier and Indian-fighter heroes.

When the Aztecs molded gods of gold and Western Indians carried gifts and captives to their totem poles they were exercising the same right to idol worship claimed today by the ardent motorist, those who worship the temple of fashion, and the devout idolaters of business or art.

The real menace of the idols of the pagans and barbarians was that the worshippers defiled their souls to the extreme of permitting them to engross their whole lives. That is the menace of modern idols.

Calgary Game Group Wants Hungarian Season Unchanged

At a meeting of the executive of the Calgary Fish and Game Association Monday evening, a resolution was passed urging that the opening date for the season for killing Hungarian partridge be on September 15, as was the case last year. Through an apparent misunderstanding, a press report recently announced that the Calgary Fish and Game Association had sponsored the change of opening of the season for Hungarian partridge.

The Calgary association made no representations or suggestions in connection with the change, it was pointed out. The change followed circulation of a recent petition among sportsmen.

—Calgary Herald.

Technical School Has Good Season

The provincial technical school at Calgary enjoyed a successful season, a total of 731 students being registered the past term. In addition 637 unemployed attended 23 classes offered, being given instruction by 36 instructors acting without salary. The school is now conducting a course in aeronautics, the only course of its kind given in Canada. It is planned during the coming term to design and build a complete aeroplane.

Alberta Crop Report.

Harvesting of 1934 wheat is now well under way in Southern Alberta, and has commenced in a few localities in Central Alberta. In the north-central and northern districts, where the weather has been cool and backward for the most part, and where rains have been frequent, harvesting will take place generally for ten days or two weeks. In these districts the ripening process has been retarded, but there is prospect now for warmer weather, which should offset the anxiety still felt concerning the danger of frost in some of the northern districts where the grain is still fairly green.

Over a considerable section of the province, grain crops have suffered some further deterioration in the past fortnight, due to the continuance of hot, dry weather. This applies to southern and south-eastern districts as well as to a fairly large area across the central portion of the province. In the north-central and northern areas, further rains have fallen and the need now is for more warm sunny weather to bring the grain to maturity, and enable harvesting to be completed to escape the possibility of early autumn frosts.

The harvesting season is not sufficiently advanced as yet to enable any definite estimate of grain yields to be made. The hope of a heavy total yield of wheat must, of course, be abandoned, but with some of the southern districts still holding out prospect of fair yields and the north-central and northern districts anticipating quite heavy crops, there can be fairly certain expectation of a total yield greater than that of 1933.

In the south-eastern districts, chiefly in the Goose Lake railway territory, the grain crops will be very short, returning in some localities little more than seed, while in others cattle have already been turned into the fields. There are still some fair crops on summer-fallow land in these districts, however.

In southern areas, while hot, dry weather has had its effect recently, there are still many bright spots, and some quite good yields will be obtained, particularly from early seeding which is expected to return a good average yield. In the foothill districts there are some very good crops in prospect, although some shrinkage is noted within the past fortnight.

In the central areas from Didsbury north to Wetaskiwin, and eastward to the Saskatchewan boundary, weather has continued warm and dry, relieved in a few localities by some showers, but not sufficient to prevent further deterioration. The yields in these areas, which normally produce good crops of grain, will be lighter than usual.

In the territory tributary to Edmonton, north-east to the Saskatchewan border and throughout the northern districts prospects are for very good yields. In the Edmonton territory, north-east and north, rains have been fairly frequent up to this date, and while the grain has been somewhat slow in ripening in many localities, more rapid progress is now being made towards the harvest stage.

With respect to feed, the situation generally is better than was the case in 1933. Some of the southern districts, however, will have a shortage. Pastures have suffered during the past fortnight from the dry weather. In the more central and northern districts, there will be a fairly abundant supply.

Cream Deliveries on Increase

Deliveries of cream to the creameries of the province continue to show a substantial increase over last year. Nearly 14 million pounds of butterfat had been received up to the end of July, compared with 12,300,000 lbs. for the same period of last year.

Coal Production

Coal production in the province during June totalled 230,950 tons, compared with 259,533 tons during June of 1933. Total production for the first six months of this year was 2,018,112 tons compared with 2,008,928 tons for the same period of 1933.

BASEBALL.

After visiting Acene last week and
holding the fast Acene ball team to
a three all tie Didsbury took a 10-1
shellacking in four innings here last
Friday night. For two innings it
promised to be a ball game with both
teams playing bang up baseball but
in the third frame Acene took to
Stouffer's slants like a duck takes to
water and whopped the local apple
around for a total of six runs. A
few errors and fumbles by the
local team didn't make the prospect
look any rosier.

The fourth session was almost as
bad, Acene getting only four runs
while retiring Didsbury without a hit.
Ward Wynan relieved Stouffer
but was hit even more freely. Dark-
ness halted the game at the
end of the fourth.

RUGBY NOTES

The monthly meeting of Rugby
W.I. was held at the home of Mrs.
Hogg with an attendance of twelve.
After a short business session Mrs.
J. Clarke, in a most interesting
paper, took up the topic of the
afternoon, "Child Welfare," follow-
ing this up with an article written
by Paul de Krief, in the July num-
ber of the Country Gentleman on
the modern use of tannic acid for
burns and scalds. "Current Events"
were taken by Mrs. Evans. Hospital
visiting occupied everyone's fingers
during the afternoon. The ap-
pointment was postponed till next
month's meeting, which will be held
at the home of Mrs. H. Jackson.

Burnside Notes.

Lone Pine W.I. met at the home
of Mrs. O. Tarncliffe on Thursday
last with a large attendance of
members and visitors. Mrs. Wm.
Lyons gave a splendid paper on the
"League of Nations." The next
meeting will be held at the home of
Mrs. Bert Pross on September 15.

Mr. Fred Metz spent Sunday with
Mr. Jim Dundas of Ailingham.
Miss Gertie McLean spent a few
days last week with Miss Marjorie
Burns.

Miss Evelyn Huntington of
Calgary has been spending the week
with Miss Alberta Metz.

Mr. and Mrs. Otto Bittner and
Mr. Albert Spraggins spent Sunday
with Mr. and Mrs. N. Eckel.

Miss Della and Mr. Stanley
Coyne visited Miss Alberta Metz
on Sunday last.

Mr. and Mrs. Wm. Lyons spent
Sunday afternoon with Mr. and
Mrs. George Metz.

Mr. and Mrs. E. B. Anderson and
Mr. and Mrs. Joe Davidson spent
the weekend with Markerville
friends.

Mr. and Mrs. D. A. Morrison of
Oids and Mr. Fred Doll spent
Sunday with Mr. and Mrs. N.
Eckel.

Miss Dorothy Cipperley of the
staff of the General Hospital, Cal-
gary, spent the weekend with her
parents here.

Mr. and Mrs. Leon Doll, Miss
Elsie Carlson and Mr. Sam McMin-
ster spent Sunday with Mr. and Mrs.
C. L. Cipperley, helping the latter
celebrate her birthday.

U. S. Market for Alberta Coal

The recent action of the U.S.
government in deciding to admit
Canadian coal without duty, will,
it is believed, bring new business to
Alberta coal mines, for both domestic
and steam coal. The Alberta
government trade commissioner has
recently been advised of the new
arrangement.

The Lure of the Lakes

Muscle, moonlight, glorious
lake breezes with six hun-
dred miles of sailing on the
Canadian Pacific's Great Lakes
Vessels S.S. Assiniboia, Kootenai
and Manitoba are at the disposal
of passengers on the company's
lines travelling from eastern to
western Canadian ports or as a
pleasant diversion on the return-
ing journey for the small and
cost of ten dollars for berth and
meals each way.

This delightful prospect fol-
lows the announcement by the

Canadian Pacific that four-piece
orchestras will, for a period of
nine weeks, dispense music on
the Assiniboia and Kootenai on
route while the vessels pass
through Georgian Bay, across
the northern part of Lake Huron,
and thence to Port William
on Lake Superior, a pleasant
and restful journey of 36
hours from Port Huron to
Owen Sound.

A trip to or from the west, this
economical optional trip em-
bracing dancing, cozy cabins,
plenty of deck space and luxu-
riously-appointed dining saloons;
with glimpses of ever-changing
scenery or bracing stretches of
blue water, is one that cannot
be overlooked. It is at the dis-
posal of every vacationist and
his season promises to be in-
creasingly popular not only with
Canadians but with visitors to
this country as well.

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Werner's Powder—they fit snugly—comfortably—they don't slip. Prescribed by world-famous dentists—they know it's the best! Costs but little—any drugstore.

WORLD HAPPENINGS BRIEFLY TOLD

Getulio Vargas, provisional president of Brazil, was elected the first constitutional president of the second Brazilian republic.

Great Britain and the United States have decided to support bilateral conversations preliminary to the 1935 naval conference for the remainder of the summer.

World powers were committed to another serious fling at disarmament next September by the official convocation of the steering committee of the disarmament conference.

As a result of improved business a firm of construction engineers at Dursley, England, is giving a week's holiday with full pay to 2,000 workers.

The Royal Academy of Music announced awards to two Canadians. The Alfred J. Whaley prize for violin went to Eugene Neuis, Winnipeg, and the Acton-Bond prize in drama to Alice Lumsden, Victoria.

Turkey, through her ambassador, formally expressed her deep regret over killing of Surgeon-Lieut. J. W. Robinson and wounding of Lieut. T. A. K. Mounsel of H.M.S. Devonshire by Turkish sentries recently.

A stratosphere torpedo capable of taking off by an electric gear and travelling through the upper ether at enormous speed, directed by wireless to its target, has been invented by the young Japanese inventor, Uno Chora. It was reported.

Miss F. M. Douglas, of Winnipeg, coauthor of the satire "Britannia Waives the Rules", returned to Canada recently on the liner Alouana. Miss Douglas, although she wrote the book about England some time ago, had never seen that country until the present trip.

Nineteen horses were recently shipped from Canada to George Knox, of Westerhill, Bishopton, near Glasgow, Scotland, the department of agriculture announced. They were the first horses sent to the British Isles from the Dominion since the war. Nine were from Western Canada.

Where People Are Natural

New York Man Wants To Get Back To Tahiti

A Canadian Press letter says: To J. L. A. McLaughlin, painter-engineer, New York, is a gloriously city of shadows, its streets paved by people wearing masks, acting parts. Homesick, McLaughlin came back from Tahiti, where he went to gather material for a book about the South Seas.

Now he wants to get back in his forty-ton ketch to "where people are themselves." Says he of Tahiti: "There the people wear no masks. Even the whites after several months' drop frowns and other facial affectations and become natural or unnatural as you prefer."

She—"Is that a popular song he is singing?"

He—"It was before he began singing it."

A seventy-year-old woman of Croy, England, has made 2,000 garments for the unemployed.

Engineers Meet

Trend Is Unmistakably Towards Better Things, Says Speaker

In the field of engineering the trend is unmistakably toward better things, Harrison P. Eddy, Boston, president of the American Society of Civil Engineers, told that body and the Western professional gathering of the Engineering Institute of Canada when he addressed the opening session of the four-day convention of the two organizations at Vancouver.

"It would be presumptuous for me to comment specifically upon trends of engineering in Canada," said Mr. Eddy, "but I would not be loyal to the Engineering Institute of Canada, of which I have the honor of being a member, if I did not give public recognition to the splendid work which it has done in upholding and advancing the profession."

He suggested more frequent and closer co-operation between the Engineering Institute of Canada and the American Society of Civil Engineers. Civil engineers from all parts of the continent attended the dual convention.

By Ruth Rogers

GO MEXICAN IN GAY COTTON SPORTS PRINT DRESS

Stretch your budget it's easily made.

You can imagine how jaunty it is in multicolored zebra-check, zebra, and its simplicity.

This model can also be carried out in tub silk, plain pastels or shirtings.

In striped shirt cotton, it's also snappy. Cut the attractively shaped, dip sleeves and the jacket that slip through slashed openings in front of waist so the stripes run in opposite direction of run diagonally.

Contrasting effects can also be worked out in this way as white linen with nautical blue or yellow and white dotted pique with plain yellow.

Style No. 988 is designed for sizes 14, 16, 18 years, 26, 28 and 40 inches bust. Size 16 requires 3 1/2 yards of 29-inch material with 1/4 yard of 27-inch or wider contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Journeys In Science

THE PLANT FACTORY

(By Gordon H. Guest, M.A.)

Scientists have been attempting for many years to find out how plants manufacture such complex materials as cellulose, starches, sugar, fats, proteins and vitamins, and it has been found that every plant contains a little factory in which there is built from the raw materials these products which are so essential to man's existence. It is in the green leaf that this wonderful process takes place. The raw materials consist of carbon dioxide, water, and minerals from the soil. Carbon dioxide is a gas which occurs in the air to the extent of three to four parts in ten thousand parts of air. This gas enters the leaf through very small openings on the surface. The minerals must be soluble in the water which comes up to the green leaf through the roots and stem from the soil. Chlorophyll, the green coloring matter in plant leaves, plays an important part in this manufacturing process. Sunlight, too, is employed, furnishing the energy which converts the raw materials into compounds such as starch and cellulose. The presence of chlorophyll is always necessary to the process, which is known to scientists as photosynthesis, coming from the Greek word meaning "to build up by means of light."

Directly or indirectly all life is dependent on these minute plant factories. Here the plant produces its own food, and from the factory this food is sent to other parts of the plant for storage. Animals live on plants, and man in turn requires the meat of animals in his diet, thus closely associating man's existence with the stores of food which are built up through the process of photosynthesis. Further, we are dependent on it for food, coal and oil. On these in turn depend steam power, motor transportation and other important factors in our civilization.

For many years scientists have attempted to duplicate in the laboratory this process which is carried on in the green leaf, but as yet attempts to do so on a practical scale have met with failure.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE ICE BOX CAKE

4 squares unsweetened chocolate
1/2 cup sugar

Dash of salt
1 cup hot water
4 egg yolks
1 teaspoon vanilla
4 egg whites, stiffly beaten
1 cup cream, whipped
2 dozen lady fingers.

Melt chocolate in top of double boiler. Add sugar, salt, and water, stirring until sugar is dissolved and mixture is blended. Remove from boiling water; add egg yolks, one at a time, beating thoroughly after each addition. Place over boiling water and cook 2 minutes, or until thickened, stirring constantly. Remove from boiling water; add vanilla and fold into egg whites. Chill. Fold in whipped cream. Line bottom and sides of mold with lady fingers. Turn chocolate mixture into mold and place remaining lady fingers on top. Chill 12 to 24 hours in refrigerator. If still soggy, it is dissolved and mixture is blended. Remove from boiling water; add egg yolks, one at a time, beating thoroughly after each addition. Place over boiling water and cook 2 minutes, or until thickened, stirring constantly. Remove from boiling water; add vanilla and fold into egg whites. Chill. Fold in whipped cream. Line bottom and sides of mold with lady fingers. Turn chocolate mixture into mold and place remaining lady fingers on top. Chill 12 to 24 hours in refrigerator.

FRUITADE

(Instant Service)

2 tablespoons crushed pineapple
or pineapple juice
1/2 cup orange juice
1/2 cup water
1 tablespoon sugar
1 tablespoon lemon juice

Drain pineapple, if canned, but do not extract all juice. Add lemon and orange juice, water and the sugar. Strain and serve very cold.

Through the vigilance of the Entomological Branch, Dominion Department of Agriculture, two serious pests were prevented from entering Canada this spring, namely, the gold tailed moth and the black vine weevil, both from Holland.

Dumb Animals Protected

England Has Draconic Law Governing Punishment For Cruelty

The New York Herald Tribune says: "Who receives the fatal third 'ticket' loses his motor license. Today in Germany not only is a three-convicted automobile thief deprived of the right to run a car again for all his life, but a three-convicted bicycle thief may bicycle no more. Considering these punishments for those who misuse machines, which do not suffer, one thinks how just it would be if they applied as well to features of flesh and blood men to often and more wretchedly abused. And like a Mosaic solution comes the discovery that England now invokes this very rule for the protection of animals from those unworthy of retaining their owners. It is said to be more effective than imprisonment."

Who, indeed, would risk being pointed at in the street as the man who will never have a dog again, the woman who had a cat and couldn't keep her? Refreshing jurisprudence, when such pat ignominy comes upon a sinner, and it is actually at work. By an amendment to the law covering cruelty, no subject of the United Kingdom who has been convicted of such wrongdoing is dismissed with a rebuke, a fine or light sentence, and so left free to continue his misdeeds. He can be sentenced to a term or for life, even to own another animal. Hereafter no Briton known to be morally unfit to belong to a dog may have one, but must live on, condemned to contemplate an empty kennel. The one-time owner of a seriously neglected dog, or a badly kept age companioned only by a cushion, say, on which a few Maltese hairs recall the pining past.

Civilized law takes children away from those who overtly abuse them, but little effort usually has been made to prevent those guilty of cruelty to animals from repeating the offense. They may be summoned to court, but there is always the possibility that the victim will suffer later more than the culprit, in irrational revenge. To be publicly deprived of the right to make a "pet" should be a potent humiliation, and neighbors, thus empowered by law, can be trusted to see that such a punishment is not evaded. The dogless miscreant is marked."

Exhibit For Museum

Australian Dilly Bag Corresponds To

White Woman's Vanity Bag

An exhibit has just found its way into the museum at Melbourne, the dilly bag of a black woman of the East Arnhem River, in the northern territory of Australia. It is the equivalent of the white woman's vanity bag.

The bag looks something like a closely woven onion bag but it is made of grass stalks instead of string. Around it are displayed and labelled the contents as carried about by the average woman of the Kokodin tribe.

Like any other woman she has her powder and her paint, white pipe clay and red ochre for painting the body. She has even some locks of hair, black and woolly and probably her own.

Here and there among relics of meals are fresh water mussel shells, a stone for pounding them open, part of a half rook, used for food, an ornament of kangaroo teeth, a fragment of plaited split cane, a small hump of beewax and a mass of wool from the cotton trees.

The life of a native woman at Alligator River is told by her "dilly bag."

Had Answer Ready

An Irishman having accidentally broken a pane in the window of a house, ran away as fast as he could. He was followed by the proprietor, and asked:

"You broke my window, fellow, did you not?" asked the proprietor.

"To be sure I did," said Pat, "and did you not see me running home for the money to pay for it?"

The rhododendron white fly has been found infesting a few nurseries in the vicinity of Vancouver and Victoria, B.C. This constitutes the first record of the pest in Canada and steps have been taken to eradicate it.

Roll Up'n'

Smoke Me Sometime

Act on the invitation! You'll never know the full meaning of roll-your-own enjoyment until you make the acquaintance of OGDEN'S Fine Cut Cigarette Tobacco.

Friendly! Yes, sir, it's a tobacco with real taste appeal. Mild and mellow and satisfying from the very first puff. You'll need no coaxing to stay with OGDEN'S once you know how well it measures up to all your expectations.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

P.S.—At any Poker Hand Premium Store or by mail, you can get 4 large books of "Chatteign" or "Vogue" cigarette papers in exchange for one complete set of Poker Hands.

Your Pipe Knows OGDEN'S Cut Plug

Memorial Church In

Baghdad Is Proposed

To Honor British Killed In Mesopotamia During War

An appeal for \$20,000 to build a "Mesopotamian Memorial Church" in Baghdad is signed by the Archbishop of Canterbury, Sir Francis Humphrys, British ambassador in Baghdad, and others.

The building which has been used as a church since 1921 was originally a Turkish guardhouse, and will shortly have to be demolished owing to town-planning developments, and the construction of a steel bridge across the River Tigris. The British community in Baghdad, numbering some 400, is anxious for a permanent church, and a site has been acquired.

It is suggested the new church should be built as a memorial to the 41,115 British lives sacrificed in Mesopotamia during the war, and to those killed in Iraq. The building would include a memorial shrine containing a book inscribed with the names of those British men and women who gave their lives on Mesopotamian soil.

"Why does a red-headed girl always marry a quiet fellow?"

"She doesn't. He just gets that way."

Jumpy Nerves

Yield to the soothing action of this medicine. You will eat better... sleep better... feel better... look better. Life will seem worth living again. Don't delay any longer. Begin taking it today.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young man, struggling to get started in a business, and is determined to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of finding an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former room mate with whom he has quarrelled. After a party at an exclusive club, when the rest of the party go to the beach by a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and gives Avis and Camilla suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartily goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters on his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts, in addition to newspaper advertising. Camilla is helped by the Tiny Tots and to deliver them over the radio.

(Now Go On With The Story)

CHAPTER LII

It was arranged that the author of the Tiny Tots and the broadcaster of their escapades would remain anonymous until the radio broadcast, when she would be introduced to the public by her sponsor, the president of the Wheatheer Cereal corporation. What the interested public did not know was that her identity was not even known to her indirect employer, Alexander Hoyt. Though desirous of meeting this mysterious individual who had so turned the tide of his fortunes, Hoyt was not insistent, and resignedly agreed to wait with his public for an introduction.

In fact, the affair rather pleased his fancy, added a dash of spice to his prosaic routine, which had been somewhat depressing during the past year.

This rejuvenation of his business was like an elixir of life to him; it stimulated his imagination and ambition as they never had been in his experience. Like all things that are precious, he had almost lost his business, his pride, his ambition, his

force he discovered how much he valued them. And as the day drew nearer when he would meet and introduce this mythical creator of the Tiny Tots to his fast-growing consuming public, he found himself almost as excited and expectant as a young man approaching his wedding day.

But before that event took place another important day added its quota of excitement to Camilla's series of startling events.

She had not seen Avis since the evening of the party at the studio when the statue was destroyed. They had avoided each other by mutual consent, and neither had discussed the other with Peter, who was seeing both of them regularly.

He had gone to the Werth's to see if Avis had arranged, played the part of the artistic critic and professional adviser with admirable calm and finesse. He discovered the possibility of no less than three places for the gardens, which were spacious and beautifully landscaped. The new garden needed a fountain figure, the rock garden a droll woodman and the English formal garden presented an idea for a symbolic group of the seasons, done in white marble.

Mrs. Werth was favorably impressed and remarked when he had gone. "So, you don't see that, do you? Camilla Hoyt managed a secret marriage?" He can begin to understand why Amelia Hoyt finally approved and accepted him. Charming boy, and I've no doubt he has talent. His quiet modesty is not a great asset, but it is a good one. It sounds too placed to interest me, but Camilla hasn't a spark of imagination in her empty little head. All she needs is a man who can do, and she will follow him anywhere. By the way, mother, I need another thousand to cover some investments I made recently. Will you tell dad to credit me with another four or five thousand?"

To some simple, life and extravagant, she would not do that, to others, existence and substance are one continual struggle. There are those who give and those who take, those who live and those who accept. It was one of the latter and always would be. Had she not been secure by her own rights of inheritance, she never would have dared set her heart on Peter Anson.

Rather than battle with the world for a living as Camilla was doing, she would have put love and illusion in the discard, even without a reluctant glance over her shoulder, and pursued a tangible fortune. Being already possessed of one, her idle fancy had settled upon a forbidden love.

What she would do with him when she got him, she was not quite sure, but Peter presented to Avis the unattainable, the goal of achievement which every man and woman has in some form or other.

Avis found Camilla unusually reticent about Terry. It was customary for her to talk volubly about her current "big moment," but she only observed casually when Avis mentioned her recent friendship with Terry. "Of course, we're going around places together. Why shouldn't we? We always have, when we had no one else more important on our minds."

"Terry's a good sort, but as lazy as you are."

"I'm lazy?" Avis queried in astonishment. "Why, I'm busy every minute!"

"And how?" Camilla laughed. "But what I want to know is, how did the Ansons straighten out the tangle? Was it Camilla who broke the statue?"

"Who else could have?" Avis questioned with an undebatable statement.

"Well, aren't you a little ashamed of yourself for driving her to such desperation over your flirtation with poor Peter?"

"It serves her right. She had no right to ruin his life by dragging him into the absurd marriage, and neither of them a dollar to their names. I could make Peter what he wants to be."

"Only by breaking him first—breaking his ideals about love and marriage. And don't think you would have much left to work on if you did that to Peter."

"And that from our most noted playwright!" Avis exclaimed in mock surprise. "What has Terry been doing to you, anyway?"

"I would be surprised," she retorted. "No, darling, not at anything you straight!" Avis saw a place to trade a straight lie.

her sleek dark hair and accented her vivid make-up to the advantage of her plain but clear-cut features. Without being beautiful, she was a stunning woman. Having nothing else to occupy her time and thought, she had specialized in herself.

"I wish these next twenty-four hours were past," she observed impatiently. "I should like to know just how to arrange my plans. So much depends upon the Paris scholarship award. I really don't hope that Peter will have a chance to win, but it will be a tremendous satisfaction to have it all settled. Tomorrow is the day, and I suppose there is nothing to do except wait. I think I'll run out and see Cathie to pass the time. I hear that she is seen about with Terry much these days. Wouldn't it be funny if those two, after playing around with everyone both of them know, would settle down together?"

"I think it would be a good thing for both of them," was Mrs. Werth's opinion. "Their experiences balance very well and their pasts would be no mystery to each other."

"It sounds too placed to interest me, but Camilla hasn't a spark of imagination in her empty little head. All she needs is a man who can do, and she will follow him anywhere. By the way, mother, I need another thousand to cover some investments I made recently. Will you tell dad to credit me with another four or five thousand?"

Canada Benefits By World's Greatest Shipping Merger

Canard White Star Limited Strengthened In Romance Of The Sea

With the organization of Canard White Star Limited, the Atlantic passenger fleets of the Canard Line and White Star Lines comprising 25 ships and the economy of 27,000 tons will be launched on the Clyde in September, are united under one management. But just as the identity of each line is preserved in the name itself, the traditions of the Lines whose collective experience in the handling of ships covers a period of 158 years will carry on.

This unique experience gained in 125 maritime days of sailing ships, braced by the less romantic but more practical development of steel ships and steam engines, has reached its culmination in the gradual but wonderful evolution of the huge, magnificent luxury liners carrying the house flags of the Canard and White Star lines to-day.

Who can hear the names of the Mauretania, the Persepolis, the Aquitania mentioned and fail to place them among the "immortals" of the Canard Line? Founded in 1840 by Samuel Canard of Halifax and dedicated to the service of humanity, the Canard Line has never failed to respond to the appeal of the Olympic, the Majestic, the Britannic, White Star ships so widely known on the seven seas.

For so long have the ports of the world welcomed the Canard and White Star ships, for so many millions of travellers have they provided a service of such "sea" as it is to be wondered at that these ships bear names to conjure with, and that their service has become a tradition for all the best and most worthy.

The history of Canard is inseparably woven with the history of Canard. It was due to the vision and courage of a Canadian, Samuel Canard, that a regular mail and passenger service was made possible between Great Britain and Canada and that steamships supplanted sail on the North Atlantic. It was his driving force and genius that built the S.S. Inuit Line, and sent her from Liverpool on July 4th, 1840, bound for Halifax with the first Canadian mail. She was the first of a line, and he guaranteed that thereafter mails and passengers would be conveyed regularly winter and summer by the steamships of his line. That this first epic voyage was completely successful was due to Samuel Canard's own genius, for the tiny paddle-wheeler Britannia of but 1,350 gross tons made the voyage in 17 days and 10 hours. And now, as a ninety-four years later, there is a ship built for the Canard White Star Line, the largest and most magnificent ship in history: No. 524 of 27,000 tons and more than 1,600 crew, a dreadnaught ship that even Samuel Canard could never have imagined.

Trade has followed the house flags of Canard and White Star, and Canard, wheat producers, farmers and manufacturers have found for their products a ready place in the markets of the world aided in their quest by the shipping facilities provided so continuously, reliably and regularly by these companies.

The growth of Canard and the increasing number of her people have been met by the continuously improved service given by both Canard and White Star. Always pioneers, the ships built by these companies for the Canadian trade have invariably embodied the newest development in steamship construction and have provided the greatest possible degree of speed, safety, beauty, seaworthiness and steadiness, and as heretofore, Canard White Star Limited will maintain frequent and regular sailings to England, Scotland, Ireland and Continental ports.

Canadians are fortunate in possessing the most beautiful seaway to Europe. The magnificent river journey from Montreal to the sea, which shortens the actual ocean voyage by days, has been a feature of Canard and White Star publicity for many years. The Atlantic Steamship Service for Canada in making the greatness, wealth and beauty of this continent known to the world. Canada's destiny as a great nation is evident, and the record of these companies would indicate that Canard and White Star Limited will march forward with it, providing for Canadian a transportation system that will meet every travel whim or need, and one that is worthy of the complete confidence which it enjoys to-day.

Ancient Coal Tones

An iron coal tones, thought to be the one used 200 years ago by David Zeisberger, founder of Schoonbrunn, first which was used in the new Philadelphia was found recently by Harry Cleving, pilot at a Schoonbrunn flying field when workmen were grading the ground.

During May 310,265 hogs were graded in Canada. For the first five months of this year, the number graded was 1,402,304 as against 1,419,616 in the corresponding months of last year.

FALSE TEETH
De WERNET'S POWDER
Sold the world over—Dr. Wernet's Powder—justly called "the perfect powder"—holds false plates firmer for hours longer. Leaves no sickening gummy paste, teeth fit as snugly yet comfortably they feel like natural ones. Prescribed by world's leading dentists—just workable on. Inexpensive—any drugstore.

Little Helps For This Week

"It is good for me that I have been afflicted, that I might learn Thy statutes." Psalm 119:71.

And yet these days of dreariness are sent us from above. They do not mean in anger. But in faithfulness and love. They come to teach us lessons Which bright ones could not yield, And to leave us blest and thankful. When their purpose is fulfilled.

Why should I rebel at the plough of my Lord that maketh deep furrows on my soul. I know He is no idle husbandman. He prepareth a crop.—S. Rutherford.

Need not distressing thoughts when they rise ever so strongly, even though they have entered your mind fear them not, but be still awhile and do not believe the power you feel they have over you, and they will fall all of a sudden. It is good for your spirit, and greatly to your advantage to be meek and variously exercised by the Lord. You do not know what He has already done, and what He is yet doing for you therein. —I. Pennington.

Has Queer Occupation

Man In England Sells Bees' Stings

Britain's queerest salesman is George Aloysius Storey. He peddles pain.

All spring and summer he wanders through the small villages and hamlets, carrying on his back a large black box which emits a loud buzzing.

The box contains bees, whose main duty is to sting his rheumatic clients. Sixpence a sting is the price charged, and he finds plenty of people willing to offer an arm or leg to a bad-tempered bee.

A reporter found Mr. Storey walking along a road between Wainford and Catterhoe, in Leicestershire. His box hummed rhythmically to his stride.

"The faith in bee-stings as a remedy for rheumatism and neuritis is unshaken among most of Britain's villagers," he said. "I have only to arrive in the smallest hamlet to find plenty of customers. I prepare a small place on the victim's arm or leg with a little stic and push the bee in a tiny wire cage on the spot. Then I tickle the bee with a straw till it becomes really angry, and stings in self-defence. Naturally, I have to keep renewing my stock of bees, and I get these from my brother-in-law who has hives near Durham."

Proved His Identity

Dog Lost For Five Years Does Tricks For Master

The saying that "elephants never forget" seems to apply equally well to dogs at least as far as "Prince," collie dog owned by a man in Quincy, Mass., is concerned.

"Prince" disappeared from home five years ago. He returned the other day to the Sully home, scratched on the door for admittance, and just to prove his identity beyond a doubt, performed a series of tricks which his master had taught him when a puppy.

Perhaps the greatest personal tragedy is to be able to do a thing pretty well but not very well.

Mrs. H. B. Ashhead of Calgary spent the past weekend at the home of her son C. H. Ashhead and family.

New Mountain Highway

Announcement of the intention of the Dominion government to proceed with the completion of the new mountain highway connecting Banff and Jasper national parks in the Alberta Rockies, is received by Alberta people with considerable pleasure. With the announcement comes the statement that labor will be recruited from unemployed ranks at regular rates of wages, which it is believed will assist in relieving the unemployment situation. The new highway, which may be completed within three years, will be one of the finest scenic routes in the world. Some 40 miles have already been completed on the Jasper end, and 17 miles on the Banff end of the route.

WEEKLY JOKE

An old colored man was burning grass when a smart fellow stopped and said, "You're foolish to do that Uncle Eb, it will make the meadow as black as you are."

"Don't worry 'bout dat, suh," replied Uncle Eb, "dat grass will grow out and be as green as you is."

Annual Mission Festival

St. Paul's Evangelical Lutheran Church celebrates its annual Mission Festival Sunday, August 19th, in the grove of Mr. Martin Jacobsen at Westcott. The German service begins at 10:30 a.m. and the English service at 3 p.m. Rev. W. Werning of Mt. Calvary Lutheran Church, Calgary, will be the speaker.

Lunch will be served by the Ladies Aid. No services will take place in Didsbury on that Sunday.
